

Because coexisting conditions often complicate hypertension...

DynaCirc[®] puts their safety first.

(isradipine)

Facilitates renal function.

- No clinically significant change in serum creatinine^{1,2} or creatinine clearance^{1,3}
- No clinically significant effect on glomerular filtration rate^{3,6}
- Maintains or decreases filtration fraction^{1,3,6}

Maintains cardiac performance.

- No significant effect on heart rate^{*7,10}
- No adverse effect on cardiac conduction^{11,12} or contractility^{† 3,10,13-15}
- No alteration of digoxin clearance¹⁶

Does not compromise metabolic parameters.

- No clinically significant effect on serum glucose metabolism¹⁷
- No effect on glucose tolerance, insulin secretion or insulin action in NIDDM patients¹⁷
- No clinically significant effect on lipid metabolism^{18,19}

- No known contraindications except for hypersensitivity to DynaCirc
- No significant interactions with the 20 most-commonly prescribed drugs*
- Effectively reduces diastolic and systolic blood pressure without orthostatic hypotension†
- Side effects are usually minimal and transient**
 - Low incidence of edema: 3.5% at 2.5 mg b.i.d. and 8.7% at 5 mg b.i.d.
 - Rare incidence of constipation or cough (<1%)
 - Headache (12.6%) and dizziness (8.0%) are the most frequently reported side effects at 2.5 mg twice a day
- Among the least expensive calcium channel blockers

*Major drug-drug interactions were not observed in a clinical trial involving 100 patients.

†In a clinical trial, the effect of DynaCirc on blood pressure was seen in patients with normal and abnormal renal function. In patients with normal renal function, the effect was seen in patients with normal and abnormal renal function. In patients with abnormal renal function, the effect was seen in patients with normal and abnormal renal function. In patients with normal renal function, the effect was seen in patients with normal and abnormal renal function. In patients with abnormal renal function, the effect was seen in patients with normal and abnormal renal function.

**Prescribed to patients aged 65 and older. Data from PDDA Top 100 Drug Uses for Dec. 1991, Nov. 1991 excluded calcium channel blockers.

§In a clinical trial, the effect of DynaCirc on blood pressure was seen in patients with normal and abnormal renal function. In patients with abnormal renal function, the effect was seen in patients with normal and abnormal renal function. In patients with normal renal function, the effect was seen in patients with normal and abnormal renal function. In patients with abnormal renal function, the effect was seen in patients with normal and abnormal renal function.

•At recommended doses, 12.5-15 mg b.i.d.

DynaCirc 
 2.5 mg capsules (isradipine) 5 mg capsules
For Safety's Sake™

BRIEF SUMMARY

Please see package insert for full prescribing information.

DYNACIRC® (isradipine) CAPSULES

INDICATION

DynaCirc® (isradipine) capsules are indicated for the management of hypertension. It may be used in combination with other antihypertensive agents.

CONTRAINDICATIONS

DynaCirc® (isradipine) capsules should not be used in patients who have known hypersensitivity to any of the components of this preparation.

WARNINGS

None.

PRECAUTIONS

General: In a study in healthy subjects, isradipine increases peripheral vascular flow. In other studies, isradipine has been shown to have a mild effect on the heart rate. In patients with symptomatic hypertension, however, isradipine has been shown to have a beneficial effect on the heart rate. In patients with symptomatic hypertension, however, isradipine has been shown to have a beneficial effect on the heart rate. In patients with symptomatic hypertension, however, isradipine has been shown to have a beneficial effect on the heart rate.

Drug Interactions: Nitroglycerin: A study in healthy subjects has shown that concomitant administration of DynaCirc® and nitroglycerin does not result in altered pharmacokinetics of either drug. In a study in hypertensive patients, addition of isradipine to existing hydrochlorothiazide therapy did not result in any unexpected adverse effects, and isradipine had an additional antihypertensive effect.

Propranolol: In a single-dose study in normal volunteers, coadministration of propranolol had a small effect on the rate but no effect on the extent of isradipine bioavailability. Coadministration of DynaCirc® resulted in significant increases in AUC (27%) and C_{max} (58%) and decreases in t_{1/2α} (23%) of propranolol. **Digoxin:** The concomitant administration of DynaCirc® and digoxin in a single-dose pharmacokinetic study did not affect renal clearance and total body clearance of digoxin. **Fentanyl Anesthesia:** Severe hypotension has been reported during fentanyl anesthesia with concomitant use of a beta blocker and a calcium channel blocker. Even though such interactions have not been seen in clinical studies with DynaCirc®, an increased volume of circulating fluids might be required if such an interaction were to occur. **Carcinogenesis, Mutagenesis, Impairment of Fertility:** Treatment of male rats for 2 years with 2.5, 7.5, or 62.5 mg/kg/day isradipine administered with the diet resulted in dose-dependent increases in the incidence of benign Leydig cell tumors and testicular hyperplasia as a relative to untreated control animals. A comparable endocrine effect was not evident in male patients receiving therapeutic doses of the drug on a chronic basis. Treatment of mice for two years with 2.5, 7.5, or 80 mg/kg/day isradipine in the diet showed no evidence of oncogenicity. There was no evidence of mutagenic potential based on the results of a battery of mutagenicity tests. No effect on fertility was observed in male and female rats. **Pregnancy: Pregnancy Category C.** There are no adequate and well-controlled studies in pregnant women. DynaCirc® should be used during pregnancy only if the potential benefit justifies the potential risk to the fetus. **Nursing Mothers:** It is not known whether DynaCirc® is excreted in human milk. A decision should be made as to whether to discontinue nursing or to discontinue the drug, taking into account the importance of the drug to the mother. **Pediatric Use:** Safety and effectiveness have not been established in children.

ADVERSE REACTIONS

The adverse reaction rates given below are principally based on controlled hypertension studies, but rarer serious events are derived from a few exposures to DynaCirc® in long-term foreign marketing experience. Most adverse reactions were mild and related to the vasodilatory effects of DynaCirc® (dizziness, edema, palpitations, flushing, tachycardia), and many were transient. About 5% of isradipine patients left studies prematurely because of adverse reactions (vs. 3% of placebo patients and 6% of active control patients), principally due to headache, edema, dizziness, palpitations, and gastrointestinal disturbances. The following adverse reactions have been reported by 1% or greater of patients receiving DynaCirc® at any dose (N=934): headache (13.7%), dizziness (7.3%), edema (7.2%), palpitations (4.0%), fatigue (3.9%), flushing (2.6%), chest pain (2.4%), nausea (1.8%), dyspnea (1.8%), abdominal discomfort (1.7%), tachycardia (1.5%), rash (1.5%), polyuria (1.5%), weakness (1.2%), vomiting (1.1%), diarrhea (1.1%). The following adverse events were reported in 0.5-1% of the isradipine-treated patients in hypertension studies, or are rare, but more serious events from this and other data sources, including postmarketing exposure, are shown in italics. The relationship of these adverse events to isradipine administration is uncertain. **Skin:** pruritus, *urticaria*. **Musculoskeletal:** cramps of legs/feet. **Respiratory:** cough. **Cardiovascular:** shortness of breath, hypotension, *atrial fibrillation, ventricular fibrillation, myocardial infarction, heart failure*. **Gastrointestinal:** abdominal discomfort, constipation, diarrhea. **Urogenital:** nocturia. **Nervous System:** drowsiness, insomnia, *ethargy, nervousness, impotence, decreased libido, depression, syncope, paresthesia* (which includes numbness and tingling), *transient ischemic attack, stroke*. **Autonomic:** hyperhidrosis, visual disturbance, dry mouth, numbness. **Miscellaneous:** throat discomfort, *leukopenia, elevated liver function tests*.

Because One Size Doesn't Fit All...

New Humulin 50/50 is the tailor-made answer to individual patient needs. A unique combination of equal amounts of Regular human insulin and NPH human insulin, it will be useful in situations in which a greater initial insulin response is desirable for greater glycemic control.

Like Humulin 70/30*, new Humulin 50/50 offers the convenience and accuracy of a premix. And it can be used in conjunction with an existing 70/30 regimen.

New **Humulin** **50/50**

50% human insulin
isophane suspension
50% human insulin injection
(recombinant DNA origin)

The Newest Option in Insulin Therapy

WARNING: Any change of insulin should be made cautiously and only under medical supervision.

*Humulin 70/30: 70% human insulin isophane suspension, 30% human insulin injection (recombinant DNA origin)

LET ME TELL YOU ABOUT THE FIRST TIME I WAS ON TELEVISION.

As a family practice physician, Dr. Alvin Sockolov had assisted in operating room number 7 at Sutter General Hospital many times. But after re-injuring his knee, there he was, undergoing ACL surgery at the hands of Dr.

David Coward. While choosing surgery was a difficult decision, choosing Sutter General was not. "Dr. Coward prefers to operate at Sutter General," says Dr. Sockolov. "A surgeon needs special equipment, fine instruments, and a capable staff to feel comfortable. Sutter General has what physicians need for procedures to run smoothly." More orthopedic surgeries are performed at

Sutter General Hospital than at any other hospital in the region. Advanced diagnostic equipment, specially trained orthopedic nurses, and a team of rehabilitation specialists all help give Sutter General a reputation that's unmatched in Northern California. In addition, educational programs, a health library, outpatient and extended care facilities provide both physicians and patients with the best resources available. "The only problem I had with Sutter General," says Dr. Sockolov, "was that when it came time to leave, I didn't want to go. Everything was top-notch." For more information about available services, call Sutter Orthopedic Center at Sutter General Hospital in Sacramento, (916) 733-8880.

ASSOCIATE DEAN AND PROGRAM DIRECTOR. UNIVERSITY OF WYOMING FAMILY PRACTICE RESIDENCY PROGRAM AT CASPER.

The Associate Dean and Program Director at the University of Wyoming Family Practice Residency Program at Casper oversees a well established, fully accredited program. This position carries the responsibilities of academic and administrative leadership, as well as teaching and research. Casper is centrally located in the state and is home to the Wyoming Medical Center, the affiliated hospital for the program, and the major medical referral center for the state. Casper offers the advantages of living in a small city that lacks the usual urban problems in an area that offers four season recreational activities. Minimum qualifications include a Doctor of Medicine degree from an approved US college of medicine; BC in Family Practice; eligibility for licensure in the state of Wyoming; and hospital staff privileges at the Wyoming Medical Center, including Obstetrical privileges. A background in Family Practice education, research, and academic administration is also required. The successful candidate should have strong interpersonal and organizational skills. Please send a cover letter of application, a CV, and the names and addresses of three references to Joseph F. Steiner, PharmD, Chairman, Associate Dean Search Committee, University of Wyoming, Family Practice Residency Program at Casper, 1522 E. A St, Casper, WY 82601. The University of Wyoming is an equal opportunity, affirmative action employer.

Yervant Khatcherian, M.D.
Department Chairman
Internal Medicine

Giving Physicians More
Of What They Want.

FHP[®]
HEALTH CARE

"As an FHP physician, I have the best of both worlds..."

Dr. Khatcherian is referring to a work environment that combines the best elements of a staff model HMO with the autonomy of private practice.

Would you enjoy this kind of environment? If so, Dr. Khatcherian would like to talk to you about joining the Internal Medicine Department at FHP Health Care, one of America's most successful and fastest growing HMOs.

FHP and Dr. Khatcherian seek physicians who welcome making decisions. About patient care, quality assurance, utilization, scheduling, physician hiring and more. "FHP offers the advantages of private practice without the headaches," says Dr. Khatcherian. "Our system offers regular, structured work hours, shared call, and schedules that allow you to plan your personal as well as professional life."

At FHP, physician teams make the decisions, very much like small group practice environments. Diverse support systems strengthen pa-

tient care. "With our own large Home Health Program and our own skilled nursing facilities, the continuum of patient care is greatly enhanced at FHP".

FHP Health Care offers a wide variety of hospitalizing/ambulatory opportunities throughout beautiful Southern California, including Los Angeles, Orange and Inland Counties. You will work in state-of-the-art environments and have set schedules, fully paid malpractice insurance, license, CME, three weeks paid vacation, excellent salary, comprehensive benefits and an incentive program rewarding individual/team performance.

FHP Health Care also has exciting I.M. practice opportunities in Arizona, New Mexico, Utah, Nevada and Guam.

Call toll-free (800) 336-2255 or send your CV to: FHP Health Care, Professional Staffing, Dept. 45, 9900 Talbert Avenue, Fountain Valley, CA 92708. An Equal Opportunity Employer.

"Ron's Rule—I give myself one week to meet new people and start having fun on a locum tenens assignment. It hasn't failed me yet."

Ron Richmond, MD, joined the CompHealth locum tenens medical staff when he completed his residency. He wanted to travel. He loves to meet people.

A little time off sounded really good. And he thinks being exposed to different types of medical practice will serve him well when he returns to his hometown to establish a community health center.

A singer. A board-certified family practitioner. A soft-spoken New Yorker. Ron Richmond knows...

It's a great way to practice medicine

ANNUAL SESSION

*Mark your February calendar
for CMA's premier
educational event!*

**February 26-March 3, 1993
Disneyland Hotel, Anaheim**

Featured will be dozens of programs, showcasing some of the finest medical educators California has to offer. And the variety of clinical topics literally spans the medical and surgical spectrum.

This year's rich and varied topics include: management of pain, screening technologies and controversies, sleep disorders, skin problems of active patients, sports injuries of the brain and spine, new standards for blood-

borne pathogens and CLIA, orthopedic update on the foot and ankle, ophthalmologic issues for primary care, treatment of rhinitis and sinusitis, common office gynecological problems, professional liability issues in breast cancer and implants, imaging choices 1993, management of common pediatric problems, carpal tunnel syndrome, management of difficult wound problems, HIV prevention, detection and early management, algorithms for alcoholics, management of "difficult" patients, tobacco intervention for special populations, disruptive physicians and the dilemmas for medical staff, residency selection and career planning, new frontiers in family medicine, workshops on cardiac life support and the suture course. **This is a great opportunity to earn CME Category I credit!**

OTHER EVENTS:

- **House of Delegates** will set CMA policy on health care issues facing physicians.
- **Hospital Medical Staff Section** and **Young Physicians Section** will convene their annual meetings.
- **Exhibit Hall** will feature latest medical and health care related products and services.

DON'T MISS OUT ON THIS GREAT OPPORTUNITY. Contact CMA TODAY and receive the 40-page Advance Program.
